```

8. Get doctor details endpoint(get):

https://doctor-ai-node-backend.vercel.app/doctor/details/{{DOCTOR_ID}}

The screenshot shows a web browser's developer console with the 'Body' tab selected. The response is a JSON object representing a doctor's details. The JSON is formatted in a 'Pretty' view, showing a nested structure for feedback, user information, specialization, and a schedule. The feedback section includes a count, rating, and two review comments. The user information includes an ID, username, email, phone number, gender, and date of birth. The specialization section lists five medical conditions: Pneumonia, Lungs, brain, heart, and cancer. The schedule section contains a single time slot ID. The response also includes a version number '13'.

```
1 {
2   "feedback": {
3     "count": 2,
4     "rating": 4.5,
5     "review": [
6       "Very good. Thank you",
7       "The doctor was amazing"
8     ]
9   },
10  "_id": "64ab25223e30db14e89c9756",
11  "username": "Dr. Shyam Mishra",
